

25th September 2017

Nursery and Reception news

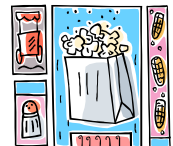

In class this week

We are making popcorn. This activity is a good example of how we link the children's interests into all areas of their learning. Describing and looking at how the popcorn changes is science, hearing 'P' and reading the popcorn label is literacy, singing a song about popcorn and dancing about in PE develops their creative skills. Making popcorn shakers will encourage their making skills. We will have a fun week and they will be learning!

At home you might like to:

- Talk about other things that change when they are heated, for example, looking at foods before and after they are cooked.
- Look for 'p' in their reading books.
- Sing songs with the shaker they bring home.

On Monday, 9th October, the school photographer will be in school to take individual and family photographs.

Accidents happen....!

It is not unusual for a child in Nursery and Reception class to wet themselves and we always quietly get them changed without any fuss. If your child does have accidents you can keep some spare clothes for them in their PE bag.
